Based on the life/artwork of Frank Ayala, Ruben A. Sanchez, and Abel Corchado, *Los Tres* tells the story of three artists as they find refuge in friendship and art, while composing their artistic vision in the face of denigration and a space/time that deliberately fails to see them.

"*Los Tres* blends mastery of visual imagery and film with a profound statement of what art can and should be -- how difficult it is, how distorting its gatekeepers are, but how powerfully it lives in the conversations and communities it calls into being." - George Lipsitz
